Stockar

standard, medium & Extra

STOCKAR has been specially designed to feed automatically the Autex spreader Lider Plus. It is recommended for:

- Those companies that has to change the bavrice rolls every often, romally, when the fabric roll has not yes finished.
- Those companies that before spreading, they prepare all the fabric rolls that join in a mattress in order toavoid wasting time looking for them during the production time.
- Allows it doing the production with an only machine operator. The salme operator who is working in the machine can prepare all the fabric rolls that join in a mattress.

Stockar has a platform which take the fabric roll has been spreaded. It can also collect the cardboard tub and load automatically the following roll in a few seconds.

Stockar can also work with Autex model loaders: Cargo-80, 100, 300, 500 and Cartecno. They load the fabric roll from the stockar to the machine cradle.

Stockar is composed by an iron chassis and a single transport belt, that allows it feeding the fabric roll one by one. At the same time, stockar has integrated an special ramp which can collect the cardboard tub or the roll that has not yet finished , to be able to load the following one in few seconds.

STOCKAR can be supplied in 3 roll capacitites:

Stockar standard:

- Capacity for 7 rolls of 25cm diameter
- Capacity for 5 rolls of 35cm diameter
- Capacity for 4 rolls of 50cm diameter
- Capacity for 3 rolls of 70cm diameter

Stockar medium:

- Capacity for 12 rolls of 25cm diameter
- Capacity for 8 rolls of 35cm diameter
- Capacity for 6 rolls of 50cm diameter
- Capacity for 5 rolls of 70cm diameter

Stockar extra:

- Capacity for 16 rolls of 25cm diameter
- Capacity for 11 rolls of 35cm diameter
- Capacity for 8 rolls of 50cm diameter
- Capacity for 6 rolls of 70cm diameter
