LAS MÁQUINAS PARA EXTENDER Y CORTAR

Tecno

Tecno is the automatic spreading machine with the best spreading quality on the market. Specially made for all types of fabrics that need to be spread face to face with the same nap direction. Supplied with automatic turntable, built-in "cradle", with a single conveyor belt across the useable width of the machine. It can do the roll change quickly and naturally in a record time of 9 seconds.

It can be installed our program Autes.com communication system.

Tecno complies with strict EU safety standards.

TECHNICAL CHARACTERISTICS

- Equipped with robotic technology.
- Automatic check control system.
- Speed variator from 0 to 100 metres/minute
- High-speed variator in cut.
- Feed by highly sensitive infrared sensor.
- Intelligent detector of end of stack with return to load point and turntable centring.
- Automatic spread height detector.
- Machine moved by four-wheel drive (4x4).
- Software program to connect the zigzag with cut.
- Intelligent control handle.
- Feeding system by "cradle", a one piece double conveyor belt that prevents marking of the fabric and problems caused by loose thread falling between rollers on multiple conveyor belt system.
- Turntable with cradle support roll with one piece double conveyor belt system across the useable width of the machine preventing tensions and marks on delicate fabrics, one belt is folding to load rolls until 100kg.
- Automatic threading and unthreading.
- Fabrics rewinding if you wish to remove it because of faults or colour variation.
- Tension Free System. Spread elastic fabrics without tension.
- Programmed feeding.
- Automatic feeding.
- Control desk with digital touch screen with parameter and information text of functions.
- Can perform normal, programmed and scale spreads.
- Self-adjusting brakes ramp according to speed of machine.
- Adjustable acceleration.
- Safety brake in case of power failure.
- Fitted with modem for technical assistance on line.
- Maximum roll weight recommended: 100kg.
- Maximum diameter of the roll: 60cm.
- Maximum height of the spreading: 22cm.
- Maximum height for manual loading: 1.6mts.
- Power consumes: 3.5Kw

TECHNO OPTIONS

- **Autex.Com** communication system.
- Spreading in **zigzag**
- Spreading with adjustable high speed cuts with or without mobile clamp.
- High speed spreads in zigzag cut
- Program to count meters per roll, working time and total meters per spread.
- Tecnocar, fast loader of rolls.
- Smooth, air blown, conveyor and vacuum tables.
- Transfer table for machine: manual, manual on rails, motorised on rails.
- Transfer table for spreads: manual, motorised.
- Rails and operator platform.

We reserve the right to make any technical modifications.
