

# Autex Loaders

AUTEX has designed for its spreading machines a wide range of fabric roll loaders called **CARGO**, these are specially designed for each type of machine. Autex has two types of loaders: the first one loads from the table and is attached to the machine; this system helps us to load from any point of the table.

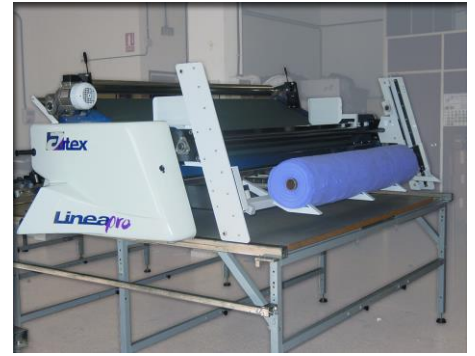

The second type loads from the floor and can be attached to the spreading table or to a transfer table; they can be self-assisted as well.

**Cargo60** Loader attached to the models Linea Pro and Linea Plus spreading machines. It loads the fabric rolls from the table to the cradle. Maximum roll weight: 100Kg.

**Cargo80** Loader attached to the Linea Pro spreading machine. Loads the fabric rolls from the table to the cradle or to the support bar system. Maximum roll weight: 100Kg.

**Cargo81** Loader attached to the Linea Plus spreading machine. It has the same characteristics of Cargo 80.

**Cargo100** Loader for Linea Pro spreading machine. It loads from the floor to the cradle. Maximum roll weight: 100Kg.

**Cargo200** Loader for Linea Plus spreading machine. It loads from the floor to the cradle. Maximum roll weight: 100Kg.

**Cargo600** Loader for Tecno spreading machine. It loads from the floor to the cradle. Maximum roll weight: 100Kg.

**Cargo300** Loader for Goliat 300 folding cradle spreading machine. It loads and unloads from the floor to the cradle and is specially design for jeans or heavy fabric. Maximum roll weight: 300Kg.

**Cargo500** Loader fixed to table for Goliat 500 folding cradle spreading machine. It has same characteristics of Cargo 300 with a maximum roll weight of 500Kg.

**Carleans300** Loader for Goliat 300 spreading machine special for jean fabric rolls. It loads and unloads with a support bar from the floor to the cradle. Maximum roll weight: 300Kg.
