

# Stockmark

STOCKMARK.  
CONVEYOR TABLES FOR LAY STORAGE.

---

## STOCKMARK. BOOST YOUR PRODUCTION

**STOCKMARK** is the ideal solution to feed the automatic cutting system while storing the lays in a synchronized and efficient way. Designed to work seamlessly with your spreading and cutting systems, this conveyor table maximizes performance, reduces downtime, and ensures accurate, hassle-free transfers.

### STOCKMARK-4: THE NEW AUTEX RANGE

The **Stockmark-4** model consists of a **four-level conveyor table**, all levels synchronized with each other and with the spreading and cutting systems. Perfect for production lines that require a continuous and automated lay transfer flow.

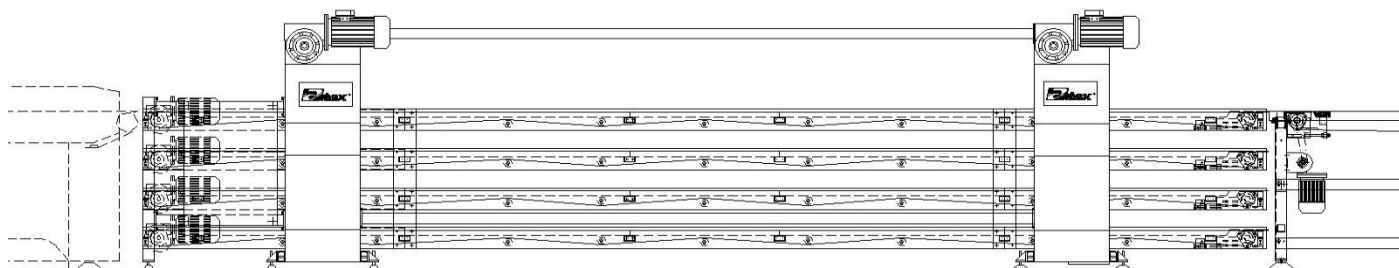

#### KEY ADVANTAGES

- ✓ Perfectly aligned transfer
- ✓ No dragging or shifting issues
- ✓ Tension-free transmission
- ✓ Space between levels: **90 mm**
- ✓ **Fully automatic system**

#### TECHNICAL FEATURES

- ✓ **Working width: up to 2.200 mm**
- ✓ **Working length: up to 12.000 mm**
- ✓ **Synchronized control panel**
- ✓ **PVC conveyor belts**
- ✓ **Optional rail transfer system**
- ✓ **Motor power: 9 HP three-phase**

**STOCKMARK-4** is more than just a conveyor table:

It's a **production optimization module** designed to take your spreading and cutting systems to the next level.
