

Napa 2100

**HIGH-EFFICIENCY TECHNOLOGY FOR PERFECT SPREADING OF
WADDING AND PADDED**

Napa²¹⁰⁰

AUTOMATIC SPREADER NAPA 2100

SPECIALLY DESIGNED FOR WADDING AND PADDED MATERIALS

*The **NAPA 2100** is the ideal solution for effortless and efficient spreading of bulky materials such as wadding and padding. Built for maximum performance with large-size pieces, it allows safe and easy handling—even by a single operator.*

KEY ADVANTAGES

- High spreading capacity: Lifts materials up to 1.65 meters, allowing layers of up to 1 meter in height.
- Easy single-operator loading: Side-mounted support bar simplifies loading from just one end.
- Fully automated movement: Automatic side-to-side shifting with adjustable stop timing for smooth zigzag rod changes.
- Effort-saving system: Mechanical lifting device raises materials without physical effort.

TECHNICAL SPECIFICATIONS

- Movement speed: 25 m/min
- Adjustable delay time: From 0.18 to 18 seconds
- Max. load capacity: 50 kg
- Power consumption: 0.350 kW
- Usable width (standard): 180 cm (customizable)
- Table width: 190 cm
- Total width: 230 cm
- Max. spreading height: 100 cm

OPTIONAL FEATURES

- Moving table
- Zigzag spreading up to 70 cm height
- Zigzag spreading up to 100 cm height

Note: We reserve the right to make technical changes without prior notice.
