

DesRoll

**DESROLL IS THE IDEAL SOLUTION FOR UNROLLING AND
RELAXING THE MOST CHALLENGING FABRICS**

DesRoll

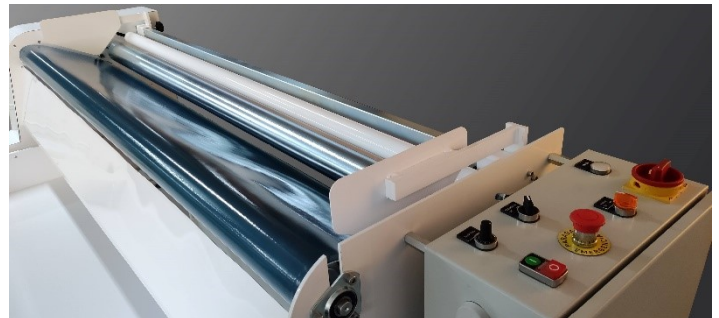

PREPARE YOUR FABRIC FOR PERFECT SPREADING

*The **AUTEX DESROLL** has been designed to unroll and relax fabric before the spreading process, eliminating the tension generated during winding and improving fabric stability.*

*Thanks to its simple operation, adjustable speed and robust construction, it can efficiently handle rolls of up to **100 kg**, ensuring a fast, safe and uniform preparation that optimizes the quality of the subsequent spreading and cutting processes.*

KEY FEATURES

- Custom-built to suit different fabric widths.
- Handles fabric rolls up to **100 kg**.
- Maximum roll diameter: **600 mm**.
- Adjustable speed to suit different fabric types.
- Simple and intuitive control panel.
- Heavy-duty construction for continuous industrial operation.
- Designed in compliance with European safety standards.

BENEFITS

- Relieves accumulated fabric tension.
- Minimizes shrinkage during the spreading process.
- Improves fabric stability and uniformity.
- Makes the operator's work easier.
- Increases production efficiency.
- Enhances spreading and cutting quality.

PERFORMANCE THAT MAKES THE DIFFERENCE

Manufactured to meet each customer's requirements, the **AUTEX DESROLL** handles rolls up to **100 kg** and **600 mm** in diameter, providing reliable, safe and continuous operation even in the most demanding production environments.

PRECISION • RELIABILITY • PRODUCTIVITY

AUTEX DESROLL. The professional solution for preparing fabric before spreading and achieving maximum quality from the very first stage of the production process.
